RHINO MARINE SYSTEMS

STABILITY AND LUXURY AT THE WATER'S EDGE

No matter how much time you spend on the water, you want to make the most of every hour, every season and every year. You want a solution that fits your needs and provides a stable, well-designed place for you to live life on the water. That's the reputation we've earned and the promise we've made as the industry's most trusted manufacturer of floating docks.

You deserve a family of products that all work together to provide a simple solution that's durable, convenient and functional. Season after season. Year after year. Our entire family of docks, ports, floats and accessories is backed by intense engineering, along with durable and overbuilt design, to provide the most reliable, stable system on the market — all to provide you a better experience on the water's edge.

RHINODOCK®

Our passion is to design, build and deliver a place for you to enjoy life on the water. RhinoDock is the industry's top-of-the-line dock system, available in both floating dock, and fixed dock configurations to perfectly match the requirements your waterfront property. Trust that your RhinoDock premium dock system is built with industry-leading strength, unmatched dock stability, and time-tested design.

RHINODOCK®

Experience the stability and strength of the industry's leading floating steel dock system. RhinoDock floating dock systems offer the highest level of dock stability and performance that is unmatched by aluminum floating dock systems. With RhinoDock, your floating dock system can become an extension of your home – providing your family with a safe, secure dock system that is unmatched in its stability and rough water performance. RhinoDock's premium dock flotation is paired with concrete decking, and a marina-grade galvanized steel substructure, to make it the smartest floating dock choice for any waterfront property owner.

RHINODOCK® FIXED PIER

Discover the strength and stability only found in the RhinoDock fixed pier. RhinoDock galvanized steel fixed pier dock systems offer the unmatched performance of a pile-driven dock system, perfect for rough water, and shallow water areas with minimal water depth fluctuation. RhinoDock's fixed pier design can accommodate a wide range of layouts in single or multiple slip configurations. Heavy Duty Pile Brackets allow RhinoDock to be mounted to varying types and sizes of piles while providing unmatched stability, and better fixed pier performance than a wood or aluminum fixed pier dock system. Concrete or wood decking, along with your choice of roof options create the best quality fixed pier dock available for your waterfront property.

RHINODOCK® DECKING OPTIONS

CONCRETE DECKING

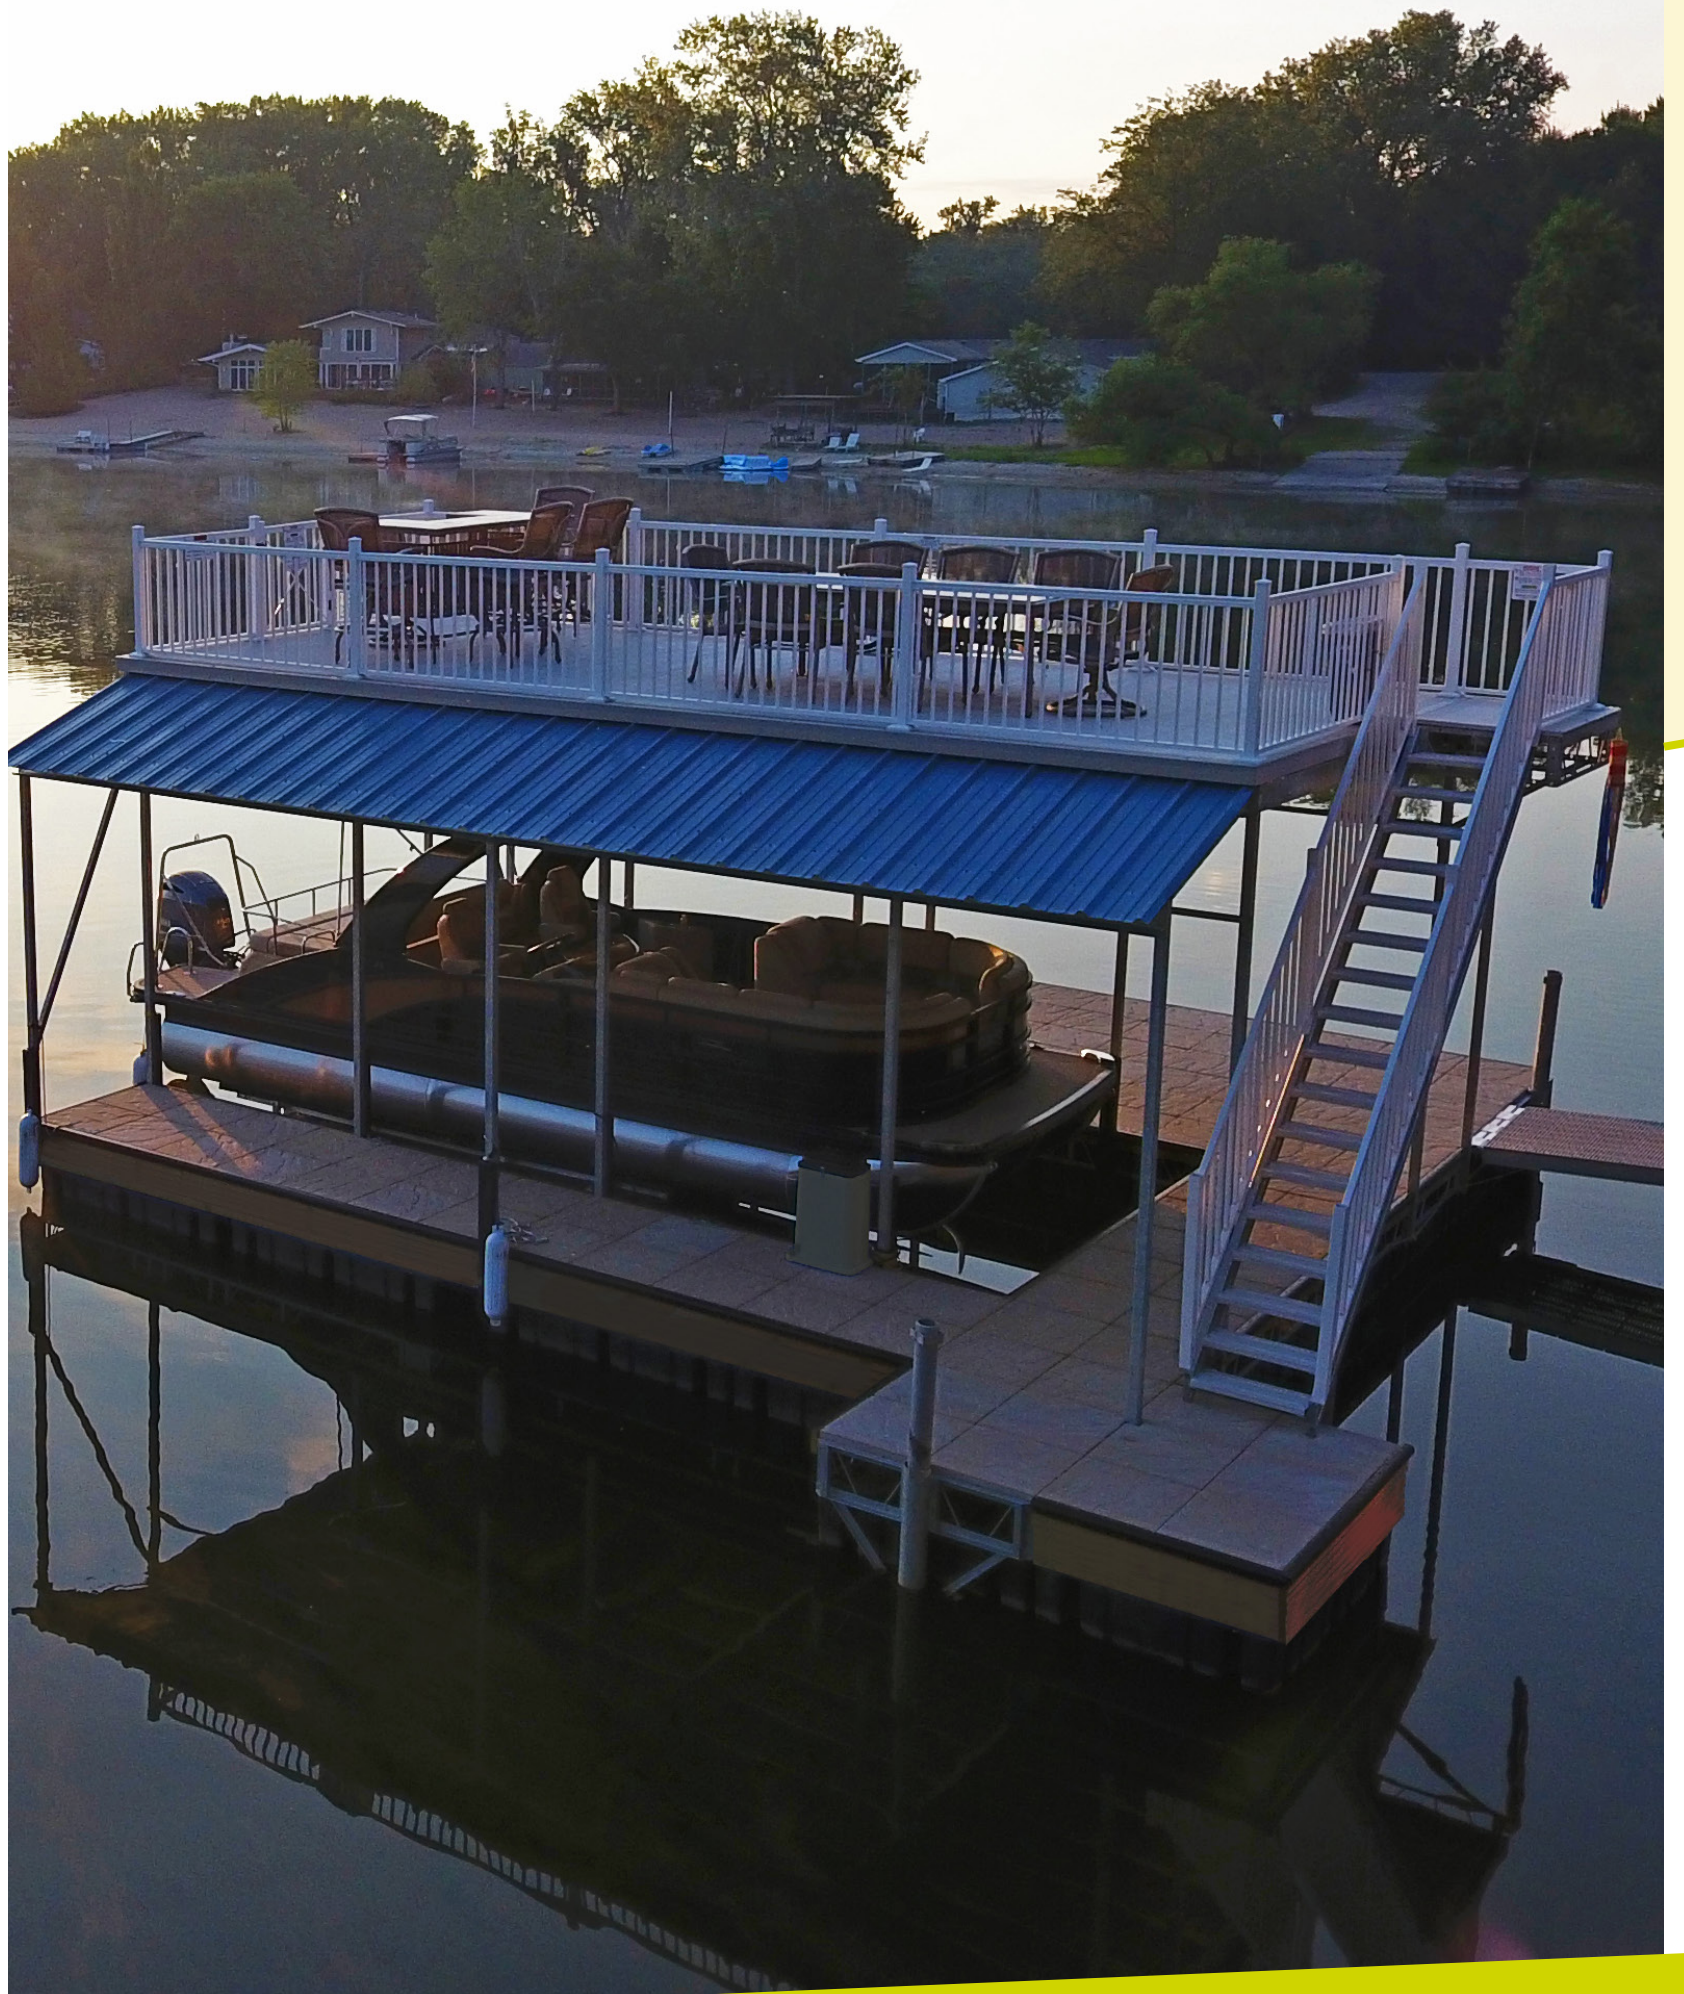

Concrete decking adds weight to the RhinoDock system making it incredibly stable, even in rough water conditions. Concrete decking is available in 2' x 2' x 1.5" pavers that can be installed by hand. Wire reinforcement is used in all pavers for durability and each paver features a slip-resistant, textured surface. Concrete pavers will not degrade even with extensive exposure to sunlight and water. Available in Sunburst or Ivory.

WOOD DECKING

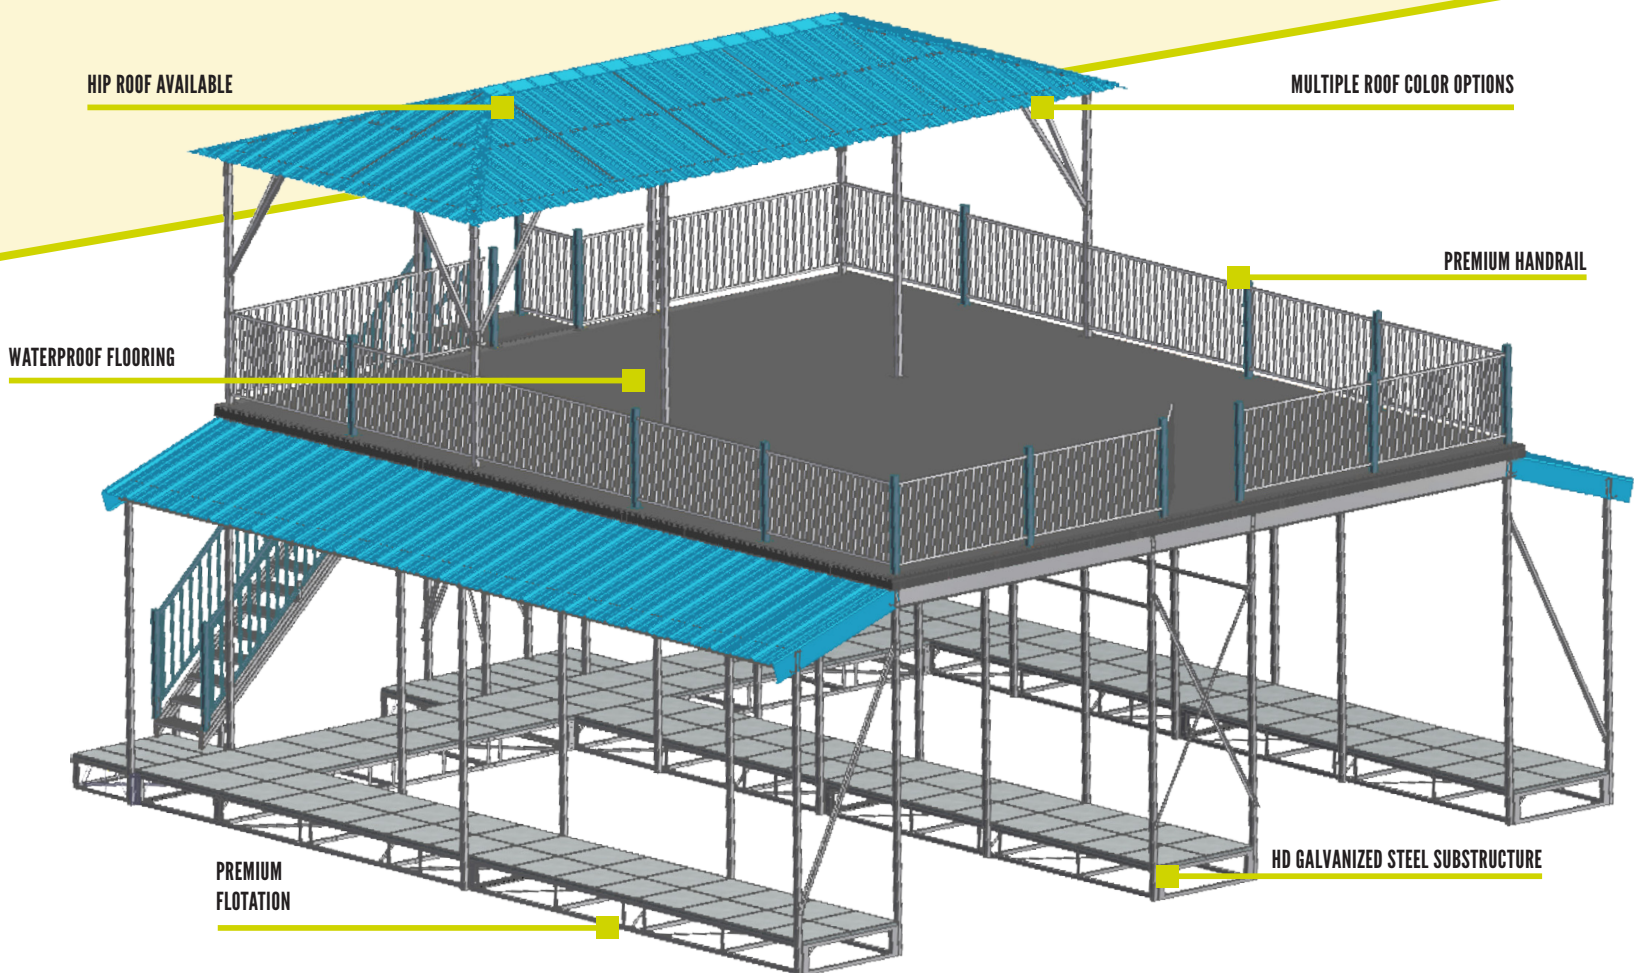

Wood decking is easy to install and maintain, and provides a simple alternative to concrete decking with a natural look. Rhino Marine Systems uses treated lumber and all decking boards are cut to the appropriate lengths prior to installation. Our wood decking is easy to clean and creates a smooth surface with minimal splinters and surface checking.

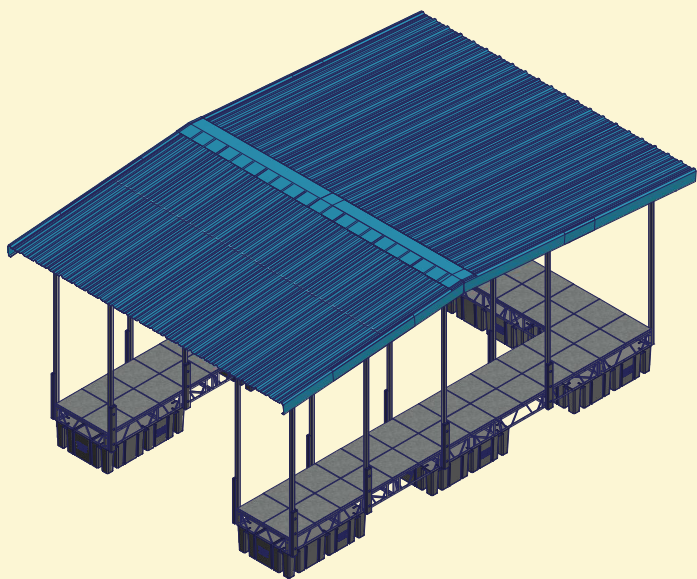

RHINODOCK® UPPER DECK

Take your RhinoDock to the next level. We've combined the strength and stability of our galvanized steel RhinoDock substructure with the first-class look and functionality of an aluminum upper deck for an industry-leading dock experience. RhinoDock's aluminum upper deck features waterproof flooring and premium handrails to provide an attractive patio space and the best in outdoor, waterside living.

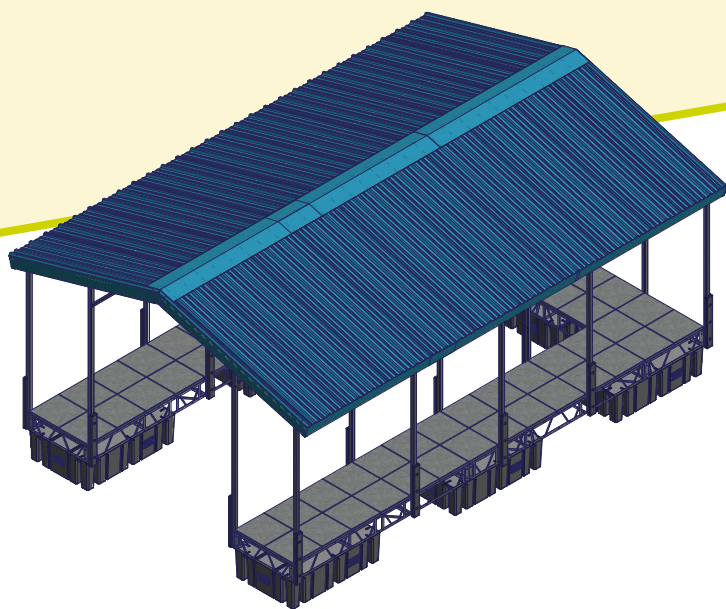

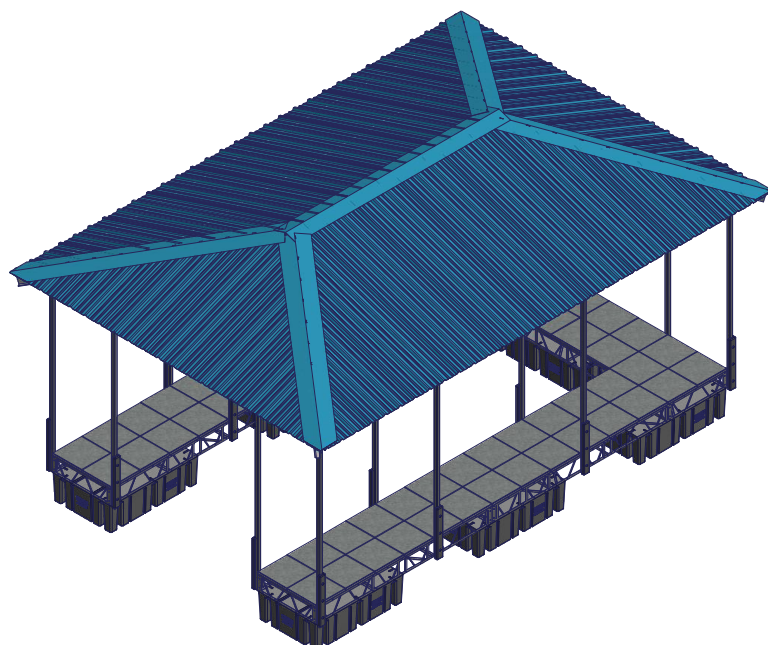

MARINE GABLE ROOF

The Marine Gable Roof originates from the original design lines of large multi-slip marinas found throughout the southern United States. This roof style is very cost competitive and simple to install while providing great watercraft protection.

A-FRAME GABLE ROOF

The A-Frame Gable Roof provides RhinoDock owners a traditional look that is familiar and similar to typical home roof construction in design and shape. The A-Frame gable allows for a wide range of deck and patio configurations.

HIP ROOF

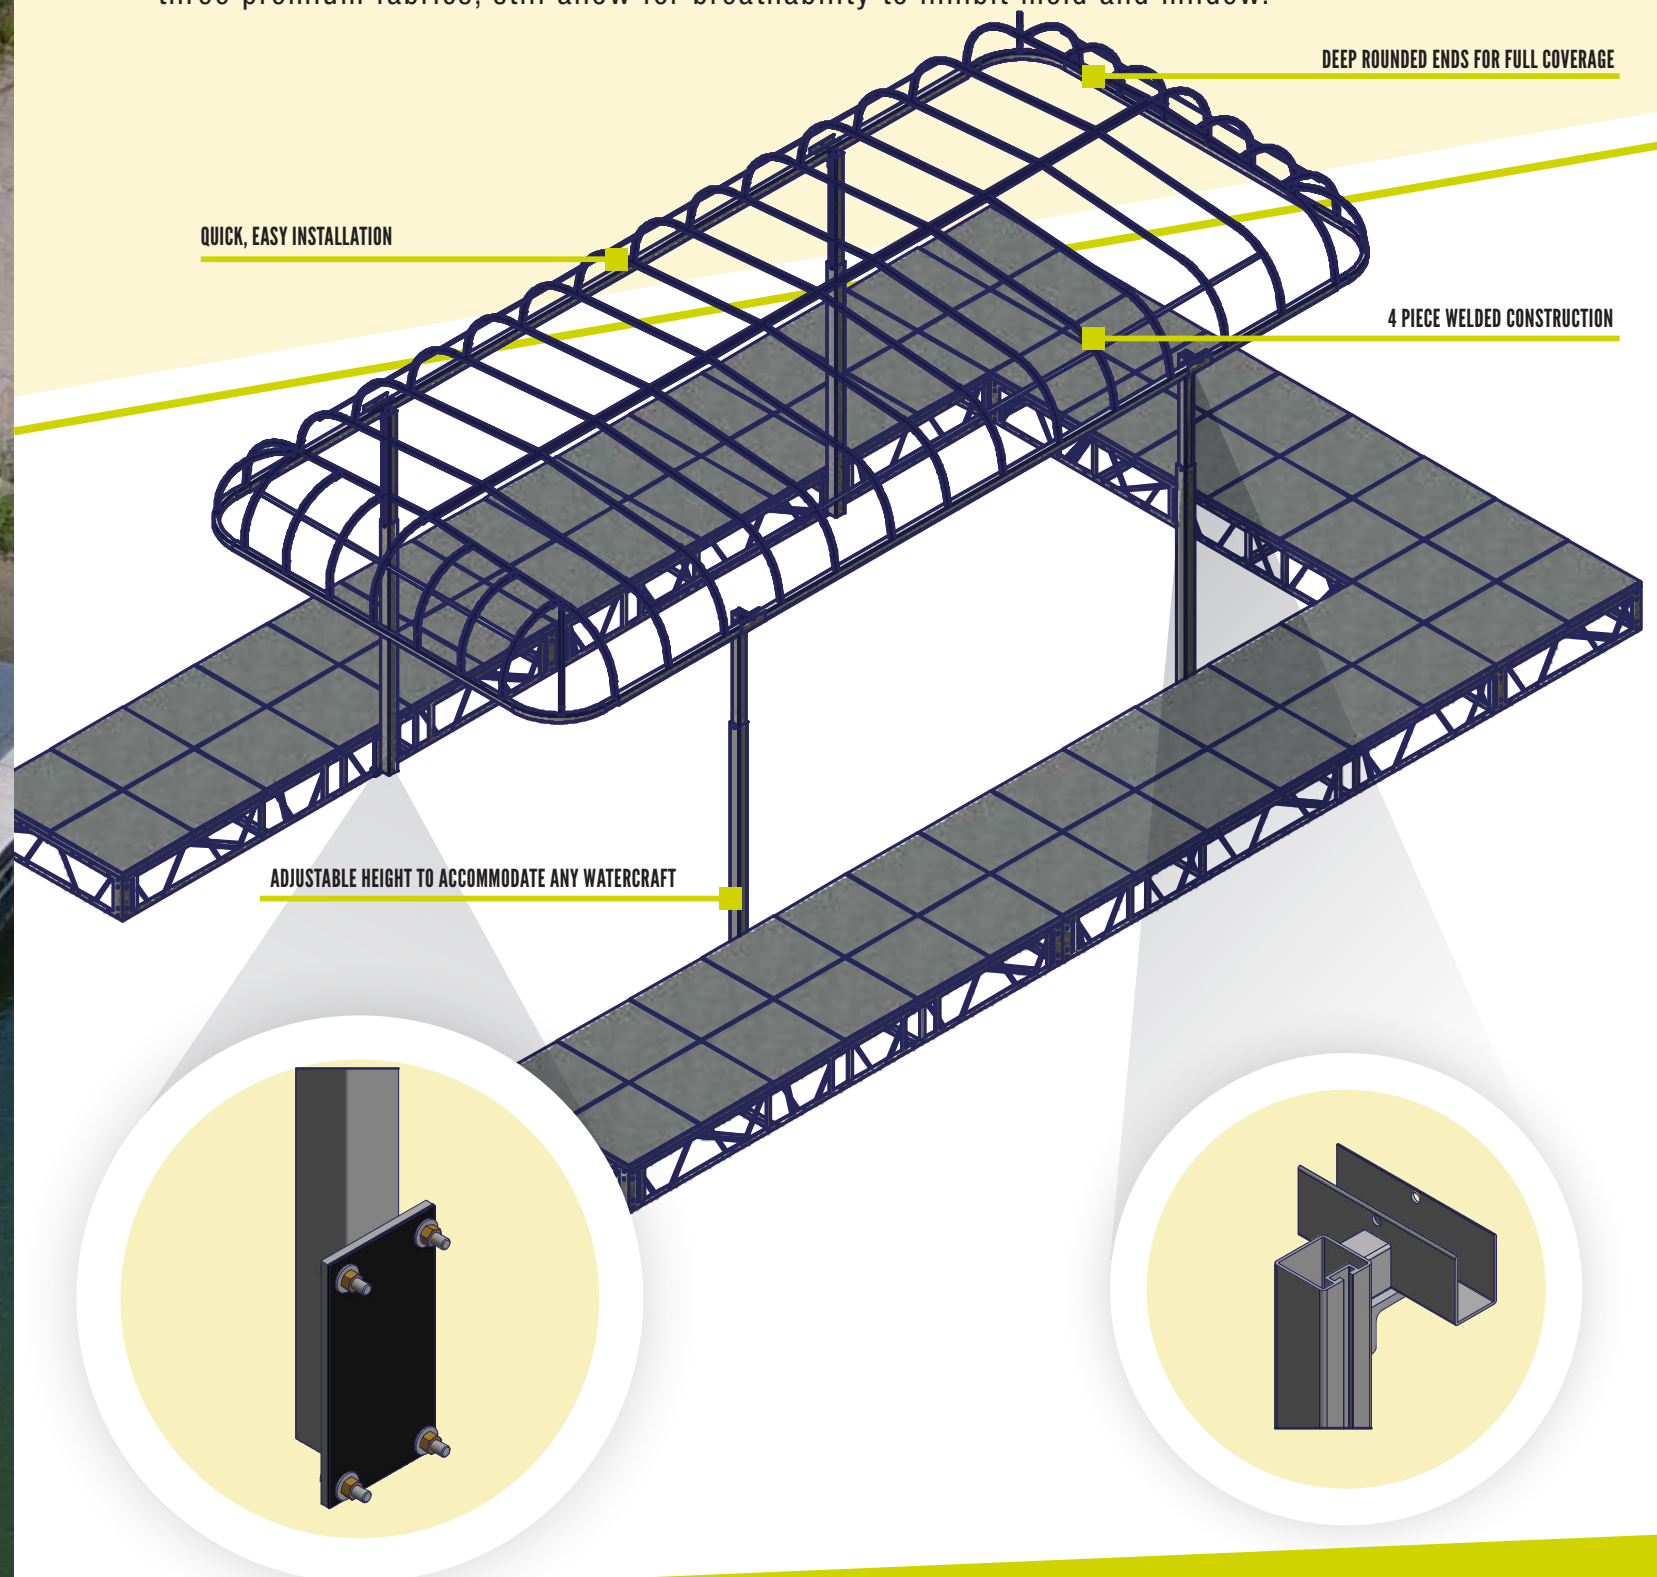

The Hip Roof from Rhino Marine Systems is an attractive option and is generally chosen when customer is seeking to match the dock roof lines to those of the home for a consistent appearance.

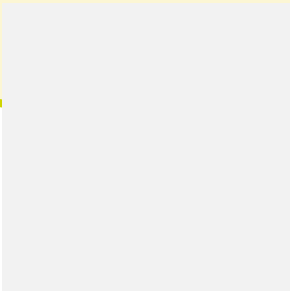

CANOPY FRAMES

For a lighter and less permanent coverage option, pair the RhinoDock with a ShoreMaster Traditional Canopy Frame. Superior craftsmanship and design paired with premium components and fabrics provide the ultimate protection for your watercraft. Deep rounded ends allow you to tuck your watercraft completely underneath the frame, while our vented canopy covers, available in three premium fabrics, still allow for breathability to inhibit mold and mildew.

METAL ROOF COLOR SWATCHES

RhinoDock offers 14 standard colors and 2 premium roof panel colors to choose from to provide you with a dock system that matches your style and your shoreline. RhinoDock roofing panels are available in 26 gauge steel to provide you with the perfect balance between strength and weight.

CANOPY COVERS

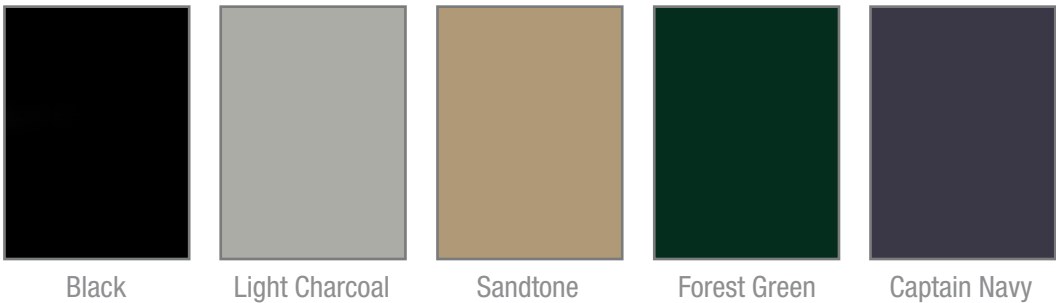

HARBORTIME

HarborTime, offers a lightweight cover option, weighing 11 oz. per sq. foot. HarborTime is highly water repellent and resistant to both mildew and ultraviolet light making it ideal for a boat lift canopy. As an acrylic-coated polyester, HarborTime offers premium visual appeal, exception abrasion resistance and superior strength making it perfectly suited for the harsh marine environment. The fabric is stabilized to ensure a continuous fit season-after-season, while the acrylic coating retains a beautiful soft cloth appearance and insures a long cover life.

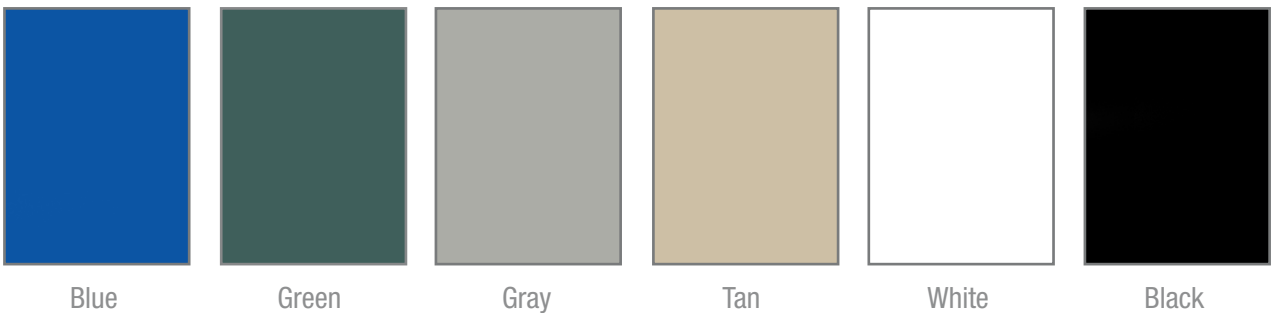

WEATHERMAX

WeatherMax® canopy covers offer superior protection from the elements for your boat. You'll enjoy WeatherMax's ease-of-use when it comes to installation, removal or storage of the cover because WeatherMax is incredibly lightweight and easy to handle.

130Z VINYL

13oz vinyl canopy covers provides excellent tear, UV, mold and mildew resistance. Plus, at 13oz our covers are lighter than the industry standard, providing easier installation and removal without sacrificing the durability or moisture and UV protection that you expect from a premium canopy cover.

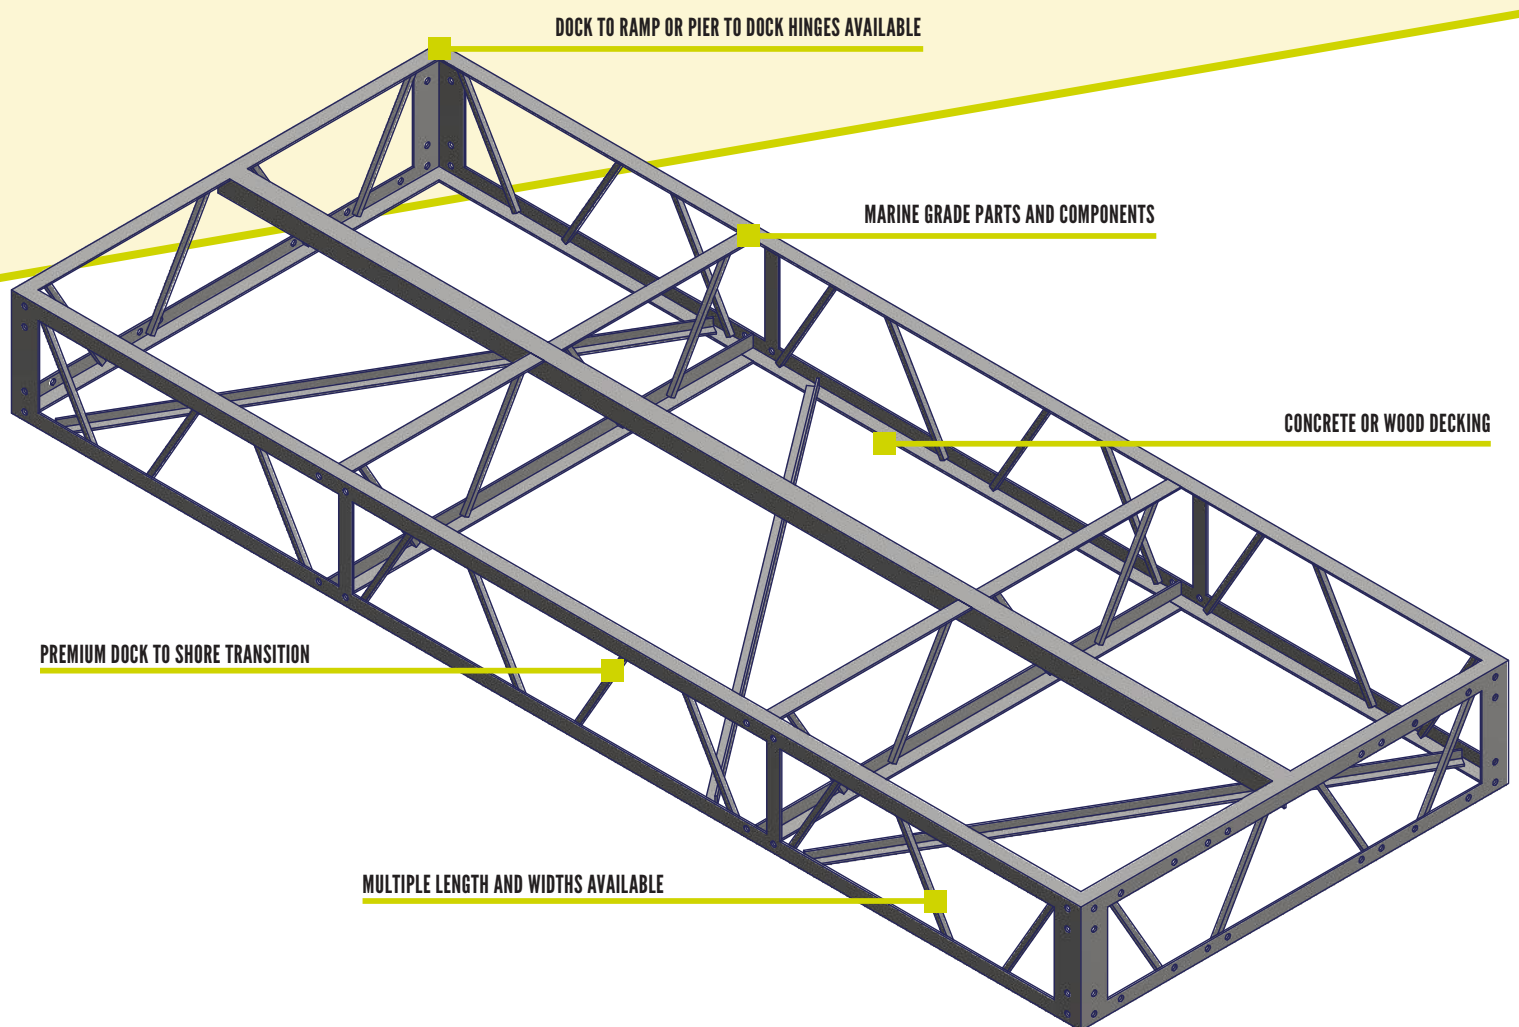

RHINODOCK® RAMPS

Ramps are a great choice for your dock-to-shore transition. Ramps are most commonly used in locations that have minimal water fluctuation, and in locations where the distance between the dock and shore is less than 20 feet. RhinoDock ramps are designed to be an integral part of the RhinoDock floating dock system so they are easy to install and easy to use. All RhinoDock ramps are constructed from high-quality galvanized steel for maximum durability and minimal maintenance.

Available in the following sizes; 4x10, 4x12, 4x16, 4x20.

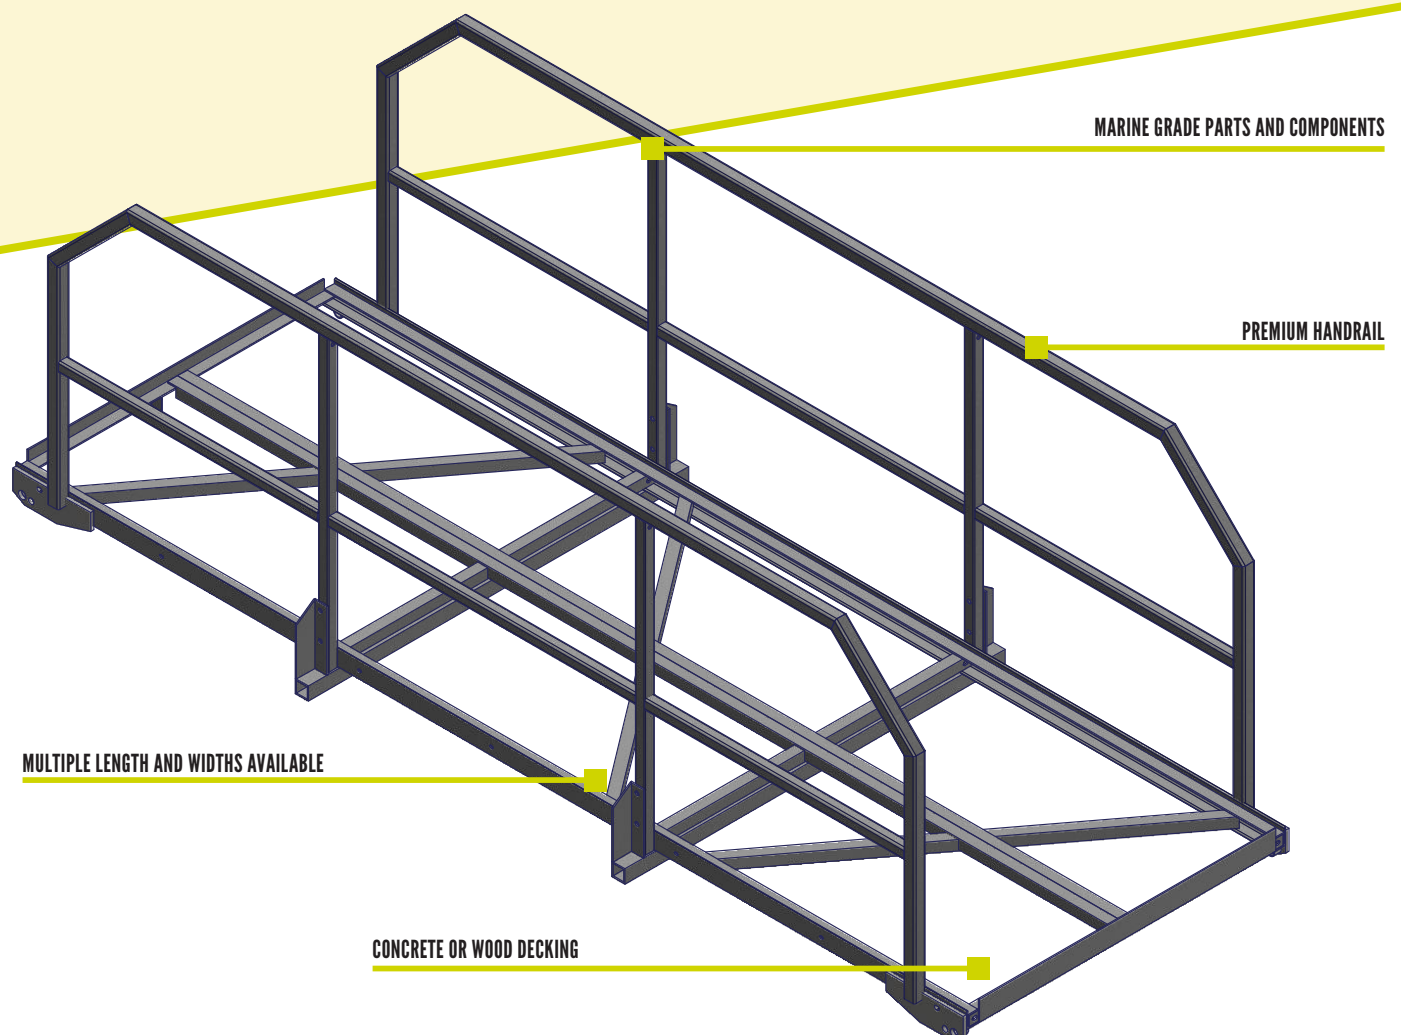

RHINODOCK® GANGWAYS

Rhino Marine Systems offers a wide range of gangways to fit nearly any shoreline. Our gangways are designed to be an integral part of the RhinoDock floating dock system so they are easy to install and easy to use. Your gangway provides your first steps to whatever it is that you enjoy doing on your dock system. We understand the importance of making sure your gangway will provide you and your family with years of safe, worry-free walks down to the dock. That's why all RhinoDock gangways are constructed from high-quality aluminum for maximum durability and minimal maintenance.

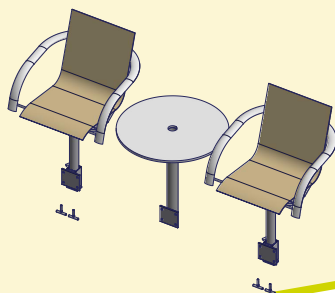

Available in the following sizes; 4x12, 4x16, 4x20, 4x24, 4x28, 4x32, 4x36, 4x40.

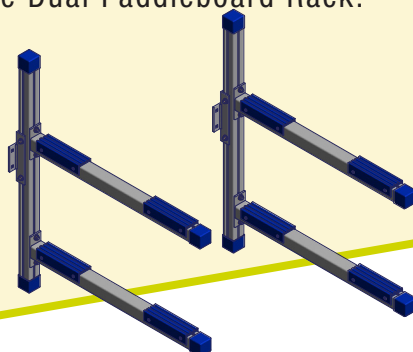

RHINODOCK® ACCESSORIES

Accessories from Rhino Marine Systems are easy to install on your new or existing RhinoDock floating dock system or ShorePort jet ski port, and they're easy to enjoy too. Accessories will help you make the most of your time on the water. Choose accessories that help you relax, like dock furniture and fishing rod holders, or choose accessories that keep you closer to your next adventure like the Water Sports Storage Rack, or the Dual Paddleboard Rack.
